

Eurocluster Project Launches Comprehensive Portfolio to Bridge Skills Gap for SMEs

26th of September 2024 – The Eurocluster Project is proud to announce the launch of a comprehensive portfolio aimed at addressing the critical skills gap faced by Small and Medium-sized Enterprises (SMEs) across Europe. This strategic initiative is designed to support upskilling and reskilling efforts, enabling potential employees to acquire the essential skills required to excel in their roles.

As SMEs continue to adapt to the rapidly evolving market landscape, one of their biggest challenges remains the growing disparity between the demand for skilled professionals and the current availability of qualified candidates. To address this, the Eurocluster Project, in collaboration with various clusters, has developed a robust portfolio of services and training programs tailored to meet industry needs.

The portfolio offers a diverse range of educational and training opportunities, including workshops, certification programs, and practical courses, all aimed at empowering professionals with the competencies needed for the modern workplace. This resource is a vital tool for both employers seeking skilled talent and individuals looking to enhance their career prospects.

The portfolio is now available for access, providing a detailed overview of the services offered by clusters throughout the duration of the project. To learn more and explore the available programs, visit
